# CHOICE AND RARE HARDY PLANTS

# Wolcott Nurseries Jackson, Michigan

Members
Women's National Agricultural and
Horticultural Association

E wish to express our appreciation of the interest shown by garden lovers in the pioneer work we are doing in this country. It is a good deal of an undertaking to bring to the public a collection of choice varieties which are little known by the majority of gardeners. But the interest is great and the desire to learn very sincere, which encourages us to forge ahead and give the people in our own America the opportunity to add to their gardens the choicest of the European gems. And as they become better known, the only wonder will be that we have deprived our-

We have been obliged to omit a few varieties from our list as we could obtain no more and must conserve what little stock we now have. But we hope to again list them next season and consider ourselves very fortunate in being able to secure as many new varieties as we have. And our list next season will be even more complete.

selves of the pleasure of growing them for so long a time.

We specialize on the desirable new and rare varieties as they make their appearance abroad or in this country and our plants are strong, vigorous stock and, grown in our trying climate, we can assure their hardiness anywhere.

We guarantee our plants to be true to name and description, but it is obviously impossible to guarantee they will grow after leaving our hands. We are always glad, however, to give all the assistance possible to our patrons by giving them any information desired as to the special requirements of any plant.

Any damage in transit or any shortage must be reported immediately to receive consideration.

We shall be glad to receive inquiries for any plants not included in this list, as we have small stocks of many choice and rare varieties.

Our lists will be increased constantly and the choicer varieties of hardy plants added as fast as we determine their hardiness and adaptability to the climatic conditions of the United States.

**TERMS**—Cash with order, unless it is desired to open an account with us. In that case, please send financial references, which of course it will take a few days to investigate.

No account opened for less than an initial order of \$10.00. Not less than six plants of the same variety supplied at the dozen rate.

# Rock Gardens

The object of a rock garden is to enable one to grow flowers that have their homes in the high mountains where snows are deep and summer very short. To be sure, all plants grown in the rockery are not natives of the alpine regions, but the great majority are, and while the beginner is apt to feel that this is a most difficult branch of gardening, it is only necessary to begin with the many easy subjects to find it not only comparatively easy but immensely fascinating and one that opens up entirely new delights in gardening.

We cannot all, of course, have extensive rock gardens; nor is it necessary, for a wonderful collection of rock plants can be grown in a small space. The most of us have a wall or bank that can be converted into a most bewitching spot with the aid of rock plants.

As a rule, alpine plants are so miniature that they at once appeal to the protective instinct and while they appear so delicate as to make one feel they must be most difficult to grow, many of them are of as easy culture as a rose. As to the more difficult kinds, one need not attempt these until their experience grows a little and it is always an incentive to greater effort to know there are delights just beyond us.

It is not necessary to have expense in order to have a delightful rock garden but rather that we turn our attention to the soil and site for the treasures we wish to possess. It must be borne in mind that rock plants are very deep rooting and so need plenty of good soil and extensive root runs, under rocks. Also that in most of cases the surface needs to be kept covered with small stones and that in all cases care should be taken that the rain supply is not cut off by overhanging rocks.

We have not listed any plants too difficult for the ordinary gardener to grow, as we realize we have few specialists on alpine plants in this country at the present time but as our garden lovers become acquainted with the charms of alpine plants, we prophecy there will be many such enthusiasts.

We will always be glad to give lists of plants for special places, free of charge, provided we have the requests between November 1st and March 1st.

	Each.	Doz.
ACHILLEA—Milfoil or Yarrow	7	
Hardy Perennial		
Well known border plants, suitable for dry and sunny places.		
A. ptarmica "Boule de Neige"—An improved variety of this useful plant, having very double flowers of a purer white than the type	.25	\$ 2.50
A. ptarmica "The Pearl"—Double pure white flowers	.20	2.00
ACONITUM—Monkshood		
Hardy Perennial		
Aconitums are very stately and beautiful plants for the hardy border. Exceedingly valuable on account of their late bloom as well as for planting in shade, as they will flourish even under trees. Thrive best in very rich soil and prefer not to be disturbed when once es- tablished.		
A. Fischeri—Semi-dwarf variety with large, pale blue flowers. Commences to bloom in September	.35	\$ 3.50 3.50
ALYSSUM—Mad Wort  Hardy Perennial		
Beautiful, showy plants for rock work, bedding, etc. They like a sunny position and well drained soil.		
A. orientale—Very showy variety, growing about a foot high and bearing large corymbs of bright yellow flowers	.20	\$ 2.00
A. saxatile citrinum—Very attractive variety with paler yellow flowers than the type	.20	2.00
A. "Silver Queen"—A very beautiful variety from Eng-		
land. Masses of pale yellow blooms	.35	3.50
high, with racemes of pale yellow flowers and rough, hoary leaves. Charming for the rock garden. Very		
rare	.50	5 00

#### Each. Doz. ANCHUSA—Alkanet Hardy Perennial Anchusas grow readily in ordinary soil in sunny sitations but quickly respond to good feeding. Their large hairy leaves and tall spikes of beautiful blue flowers make a fine background in borders and Physostegia is very effective planted in front of them, as the latter takes their place when through flowering. A. italica—"Dropmore Variety"—A beautiful variety of the Italian Alkanet with numerous flowers of deepest gentian blue. In good soil will reach a height of six to seven feet with numerous side branches, making \$ 2.50 A. italica-"Opal"-A charming blue variety. Identical with above execpt color..... .35 3.50 A. italica-"Lissadell Variety"-A recent introduction Flowers clear blue, very large; very floriferous...... .35 3.50 A. myosotidiflora—A new and very charming variety of Anchusa, its dwarf habit making it suitable either for the rockery or front of the border. Quantities of bright blue flowers in May and June..... .35 3.50 ANTIRRHINUM—Snapdragon Hardy Perennial The ordinary snapdragons are of too coarse growth to be admitted to the rock garden, but there are two or three species that are very charming in June. A dry, sunny spot and well drained soil are essential to success. A. Asarina—A trailing plant from the south of France with very attractive foliage and creamy white flowers.. \$ .35 \$ 3.50 A. glutinosum "Copper King"—A novelty of great beauty. Dwarf habit and quantities of copper colored blooms .... 5.00 .50 A. glutinosum "Crimson King"—A new variety bearing handsome, deep crimson flowers..... 5.00 .50 A. glutinosum hybridum—A charming strain of lovely colors, very valuable for the rock garden..... .35 3.50 A. sempervirens—A beautiful trailing plant for the rock garden. Flowers white with purple blotch..... .35 3.50

Each Doz. ANTHYLLIS—Vetch Hardy Perennial A. montana—Somewhat shrubby plant about one foot high with silky foliage and dense heads of pink blossoms. Very easy culture and much prized for the \$ 5.00 AQUILEGIA—Columbine Hardy Perennial The Aquilegias need no praise; they appeal to everyone by their grace and by the beauty of their flowers, the colors of the new hybrids being particularly handsome. All the Columbines may be used on the rockery, but it is better to leave the larger species and their varieties to the border, although some of them are very attractive when perched on some high spot. They thrive in shade or sun but prefer a rich, welldrained soil in partially shaded position. If not allowed to go to seed and not covered too heavily in winter, they will flourish for years and will not change their colors. Coal ashes put around the crown in the fall will help to prevent their decay. A. alpina-A charming species from Switzerland and \$ 5.00 A. cærulea—True—Lovely white and blue flowers...... \$ .25 \$ 2.50 A. cærulea-"Mrs. Nicholls"-A fine novelty. The flowers are long spurred and immense size. Beautiful coloring of Stuartii, with somewhat better constitution.... 5.00 .50 A. flabellata nana-Very dwarf white variety. The first to bloom in spring. Fine for rockery or edging..... .20 2.00 . "Silver Queen"—New. A very beautiful variety raised in England. Large, elegant flowers with long spurs, white faintly tinged rosy sapphire; 2 ft..... .50 5.00 A. "White Lady"-A beautiful variety of cærulea with white flowers and graceful foliage; 2 ft..... .50 5.00 A. canadensis—The native bright red and vellow col-.15 1.50

A. chrysantha—Bright yellow, long spurred flowers....

A. oxysepala—Dwarf and early flowering. Very attractive with flowers of blue and white with yellow centers. Very new.....

,, observation and a serious s		
E	Cach.	Doz.
A. Stuartii-A grand variety of glandulosa. Flowers		
very large, rich blue with white cup and golden		
anthers. Gem for the rockery	.50	5.0
A. Viridiflora—Rare and interesting species with		
greenish flowers. Very fragrant	.50	5 0
A. Long spurred Hybrids—Selected from the finest		
long-spurred varieties obtainable in Europe; strains		
that have received the highest awards at the Royal Horticultural Shows in London. They range in color		
from cream white to delicate lavender, blue, delicate		
pink, rose, deep purple and pure yellow; 2 ft	.25	2.5
ARABIS—Rock Cress		
Hardy Perennial		
One of the most common of rock plants. Ordinary		
soil is suitable but they must have a sunny position. We		
offer the best of the many varieties.		
A. albida—Flowers white. Very vigorous plant\$	.15	\$ 1.5
A. alpina superba—Large, pure white flowers. Fine		
for edging and for rockery\$	.15	\$ 1.5
A. aubrictioides—A beautiful variety of rock-cress,	05	0.5
bearing a profusion of delicate pink flowers	.25	2.5
A. caucasica—A cream colored alpina	.20	2 0
A. rosea—Very dwarf species with an abundance of fose colored flowers	.30	3.0
TOSC COTOLCU TIO WEIS	.50	0.0
ARENARIA—Sand Wort		
Hardy Perennial		
As their name implies, these plants do best in sand and full sun. Beautiful and of easy culture, they are		
most at home in the rock garden.		
A. cæspitosa—A close tufted plant of mossy growth,		
studded with white flowers all summer. Charming		
for the rock garden\$	.20	\$ 2.0
A. gracills—Very new and as its name indicates, of		
slender, graceful growth. Fine rock garden plant	.25	2.5
A. montana—Creeping variety, forming mounds of		
green which in early summer are covered with large	00	0.0
white blossoms. Indispensable for the rockery	.20	2.0

	ach.	Doz.
ARMERIA—Sea Pink or Thrift		
Hardy Perennial		
Small perennials, with leaves in rosettes close to the ground. Very easy culture, preferring a sunny position in light soil.		
A. caespitosa vera—Very rare, Spiny leaves, forming very compact rosettes. Pink flowers. Rockery	.50	5.00
bloom of light rose color on long stems. Very attractive	.25	2.50
A. cephalotes rubra—Flowers a deeper pink	.25	2.50
ARTEMESIA—Lactiflora		
Hardy Perennial		
A recent introduction and a most valuable addition to the hardy border. Foliage very graceful, almost like		
a Spirea. Flower stems from three to four feet high, pearing panicles of very fragrant white blooms	.25	\$ 2.50
ASTER—Dwarf Alpine		
Hardy Perennial		
A. alpinus—Very effective plants for the rock garden or edge of hardy border. Bear large, showy purple		
flowers in May and June\$	.20	\$ 2.00
A. alpinus himalaicus—More dwarf than the type and bearing a profusion of lilac blue flowers. Very	0.5	9.50
choice	.35	3.50
white flowers	.25	2,50
A. subcærulea—A very handsome dwarf aster. Tufted foliage, slightly hairy, with large, solitary flowers of		
pale blue with golden centers, making a most beautiful combination	.20	2.00
ASTILBE—Meadow Sweet		
Hardy Perennial		
Handsome border plants, especially suited to moist or half shady places. Extremely graceful and not known as well as they should be.		
A. Ceres—Delicate rose-colored flowers with silvery	0.5	0.075
sheen		\$ 3.50 5.00
1		

"OECOII WORDERIES		
	Each.	Doz.
A. grandis—A grand species, growing five to six feet tall and bearing immense panicles of white flowers	.25	2.50
A. Rubens—A recent introduction of great beauty producing large panicles of the deepest rose colored		
blooms	.50	5.00
A. Salmon Queen—Beautiful salmon pink	`.35	3.50
A. Vesta—Graceful plumes of lilac-rose	.35	3.50
A. simplicifolia—A new, dwarf, Japanese alpine. A gem for the rock garden, freely producing panicles		
of handsome white flowers. 6 inches	.50	5.00
AUBRETIA—Wall Cress		
Handa Danamial		

#### Hardy Perennial

The rock garden could ill afford to do without its wonderful masses of Aubretia that give such a rare color during April and May and which are among the most easily grown and the most showy of all rock plants. They form spreading tufts and are never seen

their best on the flat, but should be so placed that they may droop over some mound of soil or cover the face of a rock, or fall from the top of a rockery wall. A light loamy soil meets their requirements and after the flowers are over the plants should be cut back well, that the tufts may not become bare in the center. We offer the best of the new, named varieties.		
A. Bridesmaid—Pale rosy blush\$ A. Cilicica—One of the best—flowers large and freely	.25	\$ 2.50
produced. Lavender with white eye	.25	2 50
A. Craven Gem—New—Very fine deep purple	.25	2.50
A. Fire King—Glowing Crimson—Very fine	.25	2.50
A. H. MarshallRich deep mauve colored flowers; late	.25	2.50
A. J. S. Baker—Purple flowers with white eye	.25	2 50
A. Leichtlini—Bright rose colored flowers	.15	2.50
A. Mrs. Crosfield—A grand purple variety with very		
large flowers. Earlier than most	.25	2.50
A. Mrs. Lloyd Edwards—A deep reddish purple	.25	2.50
A. Perkinsii-New Violet blue with white eye; com-		
pact	.35	3.50
A. Pritchard's A-1—New—Violet flowers; compact		
habit; one of the finest	.35	3 50
A. Selected Hybrids-From fine large flowered varie-		
ties, ranging in color from rose to carmen	.20	2.00

E	Each.	Doz.
BELLIS—Daisy		
Hardy Perennial		
Nearly everyone is familiar with the common hardy daisy, but the improved form of these delightful plants is a surprise to those who see them for the first time. The size of bloom has been increased until the choicer varieties are as large as small asters. Fine for edgings.		
<ul> <li>B. Monstrosum—A monster variety of the hardy English Daisy. New, Pure white; 6 inches.</li> <li>B. Pink Beauty—Deep pink, very handsome; 6 inches.</li> <li>B. alpinus—Alpine Daisy—A graceful, spreading plant, growing about six inches high and covered with dainty pink and white single flowers throughout the</li> </ul>	.15	1.50 1.50
B. cærulescens—An exceptionally dainty little plant, flowers white, tinted lilac. Requires a warm site. Fine for the rockery; 3 inches	20	\$ 2.50
B. nivilas—(Miniature Daisy)—Of low, trailing	.20	Ψ 2.00
growth and white flowers. A gem for the rockery	.35	2.00
B. sylvestri—New. Single, deep red blooms	.25	2.50
BOCCONIA—Plume Poppy  Hardy Perennial		
B. cordata—A very handsome plant, both in foliage and flow. and fine for planting in the border or in groups in almost any position. Flowers of a creamy white, in large panicles, during July and August	.15	1.50
CAMPANULAS—Bellflowers		
Hardy Perennials and Biennials		
The Bellflowers are for the most part of a very elegant habit and beautiful appearance. The perennial varieties are all of great beauty, the taller ones being suitable for the border and very valuable as cut flowers, while the dwarfer sorts are well adapted for the front of borders and for rockeries. The most of the varieties are easily grown and unless otherwise specified, prefer a well-drained, rather rich sandy loam. Those adapted to rockery culture are among the choicest of perennial plants.		
C. alliarifolia—Showy and choice bell-flower of pyramidal habit. The flowers are white, long tubed and hang in scores from one side of arching stems	.20	2.00

	Each.	Doz.
C. barbata—So called because of the hairs inside the blooms. It requires a well-drained soil, containing plenty of stones, and more sun than most of bell-flowers. The handsome pale blue flowers are produced from May to July, on stems about 1 ft. high		5.00
C. Bowle's Hybrid—A cross between C, carpatica and C. rotundifolia. Very new and very choice	.50	5.00
C. Burghalti—A striking plant with long, silky flowers of a lavander blue tint	.25	2.50
C. carpatica—The well-known Carpathian Bellflower and suitable for the front of border and rockery. They form large compact tufts and bear a wealth of cupshaped blossoms about 1½ inches across, of a beauti-		
ful shade of blue; 1 ft		1.50
C. carpatica "Chastity"—Introduced by Norman Grove,	,	1.50
the Campanula specialist. Pure white flowers, erect habit, very flowering	50	5 00
C. carpatica "Meteor"—Another of Grove's introductions and we will give his description: "A charming bellflower with broad, somewhat flattened flowers that are almost white but have an opalescent effect caused by the soft blue coloring that shows through from the back of the segments. Plant 10 inches high."		5.00
C. carpatica—"Sclected White." An extra large and selected variety of the Carpathian Harebell. Pure white flowers, freely produced		2,50
C. carpatica—"Riverslea." A dwarf tufted plant, bearing large, flat, saucer-shaped flowers of a pale blue, on slender stems about 1 ft. high		2.50
C. garganica—A gem for the rock garden. Forms a low, spreading tuft which in June is covered with starry, light blue flowers having a white eye; exquisite hanging over a rock.		5.00
C. garganica "W. H. Paine"—Improved form of this charming Italian bellflower. Large, bright violet flowers with white center. More upright in habit than		
type. A striking plant		7.50 2.00
C. grandis—A handsome plant with tall spikes of blue flowers		2.50

	Each.	Doz.
C. Grossecki—A handsome species with large leaves, heart-shaped and coarsely toothed. Flowers all sum-		
mer, violet, in long racemes; 5 ft	.20	2.50
flowers in large heads. Flowers from July to September; 4 ft	.25	2.50
C. lactiflora alba magnifica—A beautiful variety from the Imperial gardens of Petrograd, producing spikes 6 ft. high, bearing large, snowy-white flowers. New		5.00
and choice	.50	5.00
Flowers in July, blue	.20	2.00
with royal purple flowers, 2 inches long, trumpet- shaped. Suitable for the border or wild garden	.20	2.00
C. muralis—Very dwarf plant covered with blue purple flowers in June. Fine for wall or rock garden	.50	5,00
C. persicæfolia—(Peach Bells)—One of the finest border varieties, bearing large, blue, saucer-shaped flowers on long spikes 3 ft. high. June and July	.15	1.50
C. persicæfolia alba grandiflora—A fine variety of the above, with extra large blooms. White	.15	1.50
C. persicæfolia Mærheimi—A very fine variety of the Peach Bell, with spikes of double, pure white flowers	.25	2.50
C. pusilla—One of the very choice rock bellflowers. Strong grower with a profusion of blue flowers dur-		2.00
ing July and August. About three inches high	.50	5.00
Charming for the rockery or edging	.50	5.00
compact bush some 12 inches high, with dark, wiry stems and large purple flowers. Very beautiful if		
planted near a low shrub in the rockery, to act as a light support for the beautiful blossoms	.50	5.00
C. rotundifolia—The wild blue English harebell; very graceful drooping blue bells, rising from compact		
tufts of foliage; fine for rockery	.15	1.50
ing harebell	.15	1.50
rich blue flowers. Very free	.25	2.50
nata with large, deep blue bells on spikes	.35	3.50
C. Scheuchzeri—A very graceful plant with a profusion of lavander blue flowers	.25	2.50

C. Stansfieldii—An easily grown and beautiful variety of beliflower. It forms a dwarf carpet of leaves and bears unusually large blue, somewhat drooping flowers. Charming in the rockery

WOLCOII NURSERIES		
COREOPSIS—Tick Seed	Each.	Doz.
Hardy Perennial		
C. grandiflora—A splendid, showy plant for the bor-		
der or shrubbery. Flowers bright yellow, two or three inches across, all summer. One of the best; 3 ft.	.20	2 00
C. lanceolata—A very popular plant, with lance-shaped leaves and golden yellow flowers; 2 ft	.15	1 50
DELPHINIUMS—Hardy Larksp	ur	
Hardy Perennial		
The Delphinium of today is one of the most beautiful of all flowers. It is most rich in coloring and very stately of habit. The foliage is very attractive and the spikes of bloom freely borne. A border of Delphiniums will often remain in bloom for two months.  The culture of Delphiniums is exceedingly simple and they thrive in almost any position. A rich, friable loam will suit them finely. Dig deeply, add plenty of well-rotted manure and plant about three to four feet apart, being very careful that no manure comes in contact with the roots.  Planted in lines or groups as a background for other plants, the effect is exceedingly fine. Copious watering in summer will greatly increase the size of spike and flower and top dressing is strongly recommended that the soil will not dry out and bake. Coal ashes strewn over the crowns will protect the plant from slugs and worms through the winter and spring.		
D. Arago—Flowers very large, of a clear, dazzling sky blue with mauve markings; semi-double. Very fine	1 00	\$10.00

DIANTHUS—Pinks		
Hardy Perennial		
Pinks comprise a large number of valuable plants		
for the rockery, wall garden or border. We have formed		
what we consider a very representative collection of		
Pinks. The majority are of easy culture and where any		
special treatment is necessary, we have made mention of the fact.		
All Pinks should have plenty of sun, unless other-		
wise mentioned, and the majority may be divided after		
flowering.		
D. alpestris—A vigorous grower with pale rose		
blossoms. About nine inches	.25	2.50
D. alpinus (Alpine Pink)—This is one of the loveliest		
of all rockery Pinks, with glossy leaves and large flowers of brilliant rose, produced during June and		
July. It thrives best in loam with some lime added		
and perhaps a little shade during the hottest part of		
the summer. A gem for the rock garden; 6 in\$	.25	\$ 2.50

	Each.	Doz.
D. arenarius (Sand-loving pink)—As its name indicates, this Pink delights in a sandy soil and sun. Flowers white with a carmine ring, deeply fringed		
and fragrant. Excellent for dry, hot places; 6 in	.15	1.50
Robust grower; 2 ft	.15	1.50
D. cæsius grandiflorus—This is the "Cheddar Pink" and one of the best known of the family. It is very campact in growth and makes a cushion of glaucous		
leaves from which, in May, spring the sweet-smelling, rose-colored flowers, each on its own stem. It varies		
as much as from four inches to ten inches in height. It is easily grown and very fine for the wall or rock		
garden; 6 in	.15	1.50
Deep red. Fine border plant	.25	2.50
with narrow leaves and bearing a profusion of small crimson flowers during June and July. Easily grown		
on rockery	.15	1.50
above variety	.15	1.50
above, bearing bright rose-colored flowers	.25	2.50
D. fragrans—An easy rockery pink, needing sandy loam and grit. It produces white fringed flowers. Fragrant. Sun	.15	1.50
D. gallicus—Flowers purplish crimson, highly scented, on stems about one foot high		2.00
D. giganteus—The tallest of the pinks, growing to a height of 24 to 28 inches. Bluish foliage, flowers of		2.00
medium size, bright crimson on long, unbranched stems	.25	2.50
D. graniticus (Granite Pink)—A glorified form of the Maiden Pink, rather taller and with large rose-col-		
ored flowers from June onward. Prefers a sunny place and gritty soil. Especially fine for the rock	- 11	
garden  D. kamtschaticus—Distinct rock plant and one of the	25	2.50
best introductions of recent years. It is of trailing growth with large, deep pink flowers		2.50
D. neglectus—One of the most beautiful wild Pinks in cultivation. The stems are about 6 inches high with	1	
deep rose-colored flowers, frequently borne two on a stem. No flower garden should be without this lovely	2 11	
Pink	25	2.50

	ach.	Doz.
D. seguieri—A late flowering species with rose crimson blooms on stems about a foot high	.25	2.50
D. superbus grandiflorus (Fringed Pink)-Very frag-		
rant and bears deeply fringed flowers, ranging from white to pink or rose	.15	2.50
D. superbus Holtzeri—A very beautiful variety of the above. Blooms early	.25	2.50
D. sylvestris (Wood Pink)—Bluish foliage and salmon		
pink flowers on stems about a foot high. It likes an open, sunny place in stony loam and a slight cover-		
ing of stone chips upon the surrounding soil is bene-		
ficial	.15	1.50
D. plumarius hybrids (Hardy Garden Pink)—Very easily grown and ranging from white to deep rose.		
Hardy Pinks are favorites with all gardeners and		
thrive in a sunny, well-drained position. Very fine strain	.15	1.50
D. plumarius "Cyclops"—Lovely large-flowered single		
Pinks of rose or crimson color; fine for cutting; 15 in.	.15	1.50
D. plumarius "Homer"—Rosy pink with dark center D. plumarius "Maurice Pritchard"—Perhaps the finest	.15	1.50
single Pink. Robust constitution. Exceptionally		
large pink flowers. Excellent for cutting	.15	1.50
D. plumarius "Mrs. Sinkins"—Large double white flowers. Very fragrant	.25	2.50
D. plumarius "Munstead Strain"—A charming class of		
pheasant-eyed Pinks. Single flowers and very frag-	15	1.50
Hardy Carnations—The genuine hardy border carnation	.15	1.50
is a great addition to the garden. During the last few		
years great progress has been made in the culture of these plants and we take great pleasure in of-		
fering a strain from one of the best known growers		
in Scotland. They are perfectly hardy and bear in profusion blooms that are quite as large and just as		
handsome as the greenhouse variety	.25	2.50
SWEET WILLIAM	:	£.
Hardy Perennial		
D. barbatus "Diadem"—Most effective. Rich crimson	.15	1.50

D. barbatus "Scarlet Beauty"—An intensely rich deep scarlet. Very new and very fine	.15	1.50
pure white variety	.15	1.50
old-fashioned double Sweet William	.15	1.50
DIGITALIS—Foxglove  Hardy Perennial		
The Foxglove has been a favorite in gardens since our grandmother's time and adds beauty and dignity to any planting. The newer varieties show exceedingly choice colorings as well as increased size in spike and bloom and in combination with Larkspur and Canterbury Bells, create a most charming spot in any garden. Their cultivation will give no trouble if given a rich, friable soil and not treated too kindly by covering the crowns for the winter. Cornstalks, so placed that they do not mat down, make an ideal covering, as they must have air during the winter. It is also well to remove some of the largest leaves.  D. "Ayshire White" (New White Foxglove)—A very fine variety, producing large spikes of pure white flowers  D. "Giant Primrose"—A beautiful Foxglove with large flowers of cream or buff color	.25	\$ 2 50 2.00 1 50
DRABA—Whitlow-Grass		
Hardy Perennial		
One of the important spring flowering plants for the rockery. Very dwarf and compact with numerous small flowers in early spring. They require an open soil and sunny position. D. aizoides—Forms beautiful little rosettes of hairy		
leaves, covered in spring with bright yellow flowers about 2 inches high	.35	\$ 3.50
two to twelve inches high. Rockery	.35	3.50

22

D. lasiocarpa—Very attractive rosettes of densely	Each.	Doz.

stems and bracts of a glistening metallic sheen	.20	2.00
GAILI ARDIA Blanket Flower		

### GAILLARDIA—Blanket Flower

Hardy Perennial

During the summer and autumn months Gaillardia are among the gayest and most showy flowers and when grown in masses are literally a sheet of brilliant color. The flowers last a long time either on the plants or in a cut state.

The hybridist has been busy during the last few years and the march forward in Gaillardia raising has been extremely rapid, both as to color and size. The culture of the Gaillardia is extremely easy as they thrive in almost any position, although preferring full sun and a moderately rich soil, well drained. They are very handsome planted with Lilium Elegans.	ach.	Doz.
G. Cissie Loftus—Chrome yellow, deepening to bronze in the centre; large flower with two rows of petals \$	.35	\$ 3.50

# HOLLYHOCK—Althaea Rosea

Hardy Perennial

No hardy garden is complete without the stately and majestic Hollyhock. They lend beauty to the hardy border or shrubbery which cannot be secured with any

other plant.

The Hollyhock requires a deeply dug, well enriched soil and should be well supplied with water during the summer months. They will live and thrive for years if protected around the collar with sand or coal ashes during winter and if the stem is left a foot or so high instead of being cut to the ground, it will prevent the crown from rotting.

So far as we know, there is no absolute cure or prevention of the Hollyhock disease but we are pleased to give our patrons the benefit of a remedy found most ef-

fective by the specialists in England.

"Slack one peck of lime and when cool add one peck of soot, 1 pound of flowers of sulphur and half an ounce of sulphate of copper (finely powdered). Pass the mixture through a fine sieve and dust the plants well over with it three or four times during the growing season, preferably early in the day while the dew is still on the plants."

We have been fortunate in being able to secure the most famous strain of Hollyhocks in the world and it affords us much pleasure to be able to offer them to our trade for the first time in this country.

Doz. A. Amaranth-Deep amaranth pink. Very distinct. Large and full..... \$ 3.50 A. Black Knight Improved-Distinct black and best of 3.50 A. Decora—(New.) MYOSOTIS—Forget-me-not	acii.	Doz.
Hardy Perennial		
Nearly everyone is familiar with the Forget-me-not		
which makes such beautiful pictures in the garden in		
early spring. They are alike charming in the border, rock garden or by the water side. They all require		
shade and a fair amount of moisture.		
M. Alpine Blue-One of the most intense blues of all		
the Forget-me-nots and makes a very compact growth; 9 inches\$	15	\$ 1.50
M. Blue King—One of the richest and deepest colored	.13	φ 1.55
blues of all the Alpine Forget-me-nots; 10 in	.15	1.50
M. alpestris—(Alpine Forget-me-not)—Bright blue; a		
lovely rock garden plant	.15	1.50
M. alpestris rosea—Charming pink variety of above	.15	1.50
M. alpestris "Queen Victoria"—Improved dwarf variety with large flowers in clusters	.15	1.50
M. Palustris Semperflorens—Large rich blue flowers		2.00
with yellow eye, a charming plant for damp places		
and a more profuse bloomer than the type	.15	1.50
M. Ruth Fisher—A fine new hybrid of compact habit, with dark green glossy foliage and large, bright blue		
flowers	.25	2 50
M. Spring Beauty—A beautiful early flowering variety		
of compact habit and charming light blue flowers; 10 inches	.25	2 50
M. Royal Blue—An exquisite variety of Forget-me-	.20	~ 0 3
not, literally covered with flowers of beautiful indige		
blue in long sprays. A mass of this makes a sight not to be forgotten. Fine for cutting; 12 in	.15	1.50
M. Welwitschii—A Spanish species with large blue	.13	1.50
flowers and distinct yellow eye. Makes a compact,		
tufted growth. Choice	.20	2.00
M. White Lady—A beautiful variety, covered with clusters of white flowers, having a small, striking yel-		
low eye; 10 in	.15	1.50
MYRRHIS—Myrrh		
Hardy Perennial		
M. odorata—The Sweet Cicely of English gardens. A		
very attractive plant having finely cut foliage re- sembling a large fern and bearing panicles of lace-		
like white bloom in early spring. Very valuable as a		0 0
background for spring blooming bulbs\$	.25	\$ 2.50

WOLCOTT NUKSLKILS		
NEPETA—Catmint  Hardy Perennial	Each.	Doz.
N. macrantha—A free growing plant with spikes of lavender flowers	.15	1 50
N. Mussini Superba—A branching plant bearing numerous lavender-colored flowers. The leaves are small and grayish and is a most useful plant for color	,	
N. Mussini Dark Var.—A new variety of the above	.20	2.00
with deep blue flowers	.25	2 50
Rather dwarf and compact grower	.50	5 00
OENOTHERA—Evening Primre	se	
Hardy Perennial		
The Evening Primroses are excellent subjects for planting in sunny, exposed parts of the garden and are especially fond of a sandy soil.		
O. speciosa—Large, pure white flowers, about 3 in: across	.20	\$ 2.00
O. speciosa rosea—A most striking new variety. The beautiful rose colored flowers cover the plant from early summer until frost	.25	2.50
O. taraxacifolia—Forms a spreading tuft of leaves close to the ground, from which spring twisted stems bearing very large white blooms, turning to pink with age. Very attractive	.50	5.00
PAPAVER—Poppy		
Hardy Perennial		
P. alpinum—Like a small and more delicate Iceland Poppy having flowers of white, pink, orange or yellow		
and often delicately fringed. Transplants best when quite small. True stock, from Switzerland	.20	\$ 2.00
P. nudicale—Iceland Poppy—A native of the arctic regions and mostly yellow flowered. Very showy		
and excellent for cut flowers	.20	2.00
flowers	.20	2.00
P. orientale—Gorgeous subjects for the hardy border and very easily grown. The new shades of pink are		
exquisite and harmonize with other plants in the garden which the older orange scarlet shades do not always do.		
P. "Beauty of Livermere"—Deep ox-blooded red	.25	2.50

WOLCOTT NOROEKILO		
	Each.	Doz.
P. "Mahoney"—Deep mahogany color. Very hand-	.25	2.50
P. "Mary Studholme"—Salmon with a silvery sheen and deep carmine at the base. One of the best	.25	2 50
P. "Mrs. Perry"—Orange apricot shade	.25	2,50
Finest mixed seedlings, from named varieties	.20	2.00
HARDY PHLOX		
Perennial		
These beautiful hardy border plants are among the most effective things in the garden during the late summer and fall months. The varieties have been much improved during the past few years, both as to color and size of pip. To be at their best, they require soil which has been deeply enriched and plenty of water during the blooming period. It is also well to remember that they should never be allowed to go to seed and should be divided every three years, or they will become small and in not a few cases, change their color.  We have tried to confine our list to the very best of the numerous varieties offered and can safely say there is not a poor variety in the lot.  Baron von Dedem—Large, handsome spike; brilliant		
blood red flower	.15	\$ 1.50
and spike. Bright salmon pink with dark red eye	.25	2.50
Eugene Danzenvillier—Lilac, shading to white at the edges	.15	1.50
Europa—A new variety, white with large crimson-car-		2.00
mine eye. Very large flower and truss	.25	2.50
Frau Anton Buckner—The finest white phlox. Strong	1.5	1.50
habit and flowers of an enormous size	.15	1.50
attractive	.25	2.50
Jeanne d' Arc-Good late flowering pure white. Very		
free bloomer	.15	1.50
Le Mahdi—Dark purple violet. Late	.15	1.50
Louise Abbema—Very large, dwarf, pure white	.15	1.50
Mme. Paul Dutrie—Very soft, delicate pink. Flowers very large, immense panicle	.15	1.50
Miss Lingard—An early flowering variety, beginning in	.10	1.50
June and continuing all summer. White, with faint		
lilac eye and handsome, deep green foliage, it is a most popular variety for planting in masses	.20	2.00
most popular variety for planting in masses	.20	2.00

77	ach.	Doz.
Mrs. Jenkins—Pure white, enormous truss. Free bloomer and one of the best white	.20	2.00
Obergartner Wittig—Deep rose with carmine eye.  Large flowers and truss	.15	1.50
Rheinlander—Very handsome salmon-pink with deep claret-red eye. Flowers and truss of immense size. Very choice	.25	2.50
Rosenberg—Bright reddish-violet with blood-red eye. A most striking variety	.15	1.50
R. P. Struthers—Bright rosy-carmine with claret-red eye. Very brilliant	.15	1.50
Rynstrom—Beautiful rose pink. Extra fine	.25	2.50
Thor—Enormous flowers of a deep salmon pink, over- laid with scarlet. A most beautiful variety	.25	2.50
Von Lassburg—Pure white; very large individual flowers	.15	1.50
W. C. Egan—A most beautiful variety of soft pink with	OF.	2.50
bright red eye. Immense flower and truss. Very fine Widar—Purple violet with very large white center	.25	2.00
widai—I diple violet with very large willte center	.20	2.00
PHLOX ARENDSI		
Hardy Perennial		
This new strain of early flowering Phlox originated		
from crossing P. canadensis and P. decussata. The		
plants are vigorous, from 12 inches to 24 inches high		
and produce masses of bloom from the latter part of		
May until July.		
Amanda—Bright lilac with deeper eye. Very dwarf\$		\$ 2.50
Charlotte—Pale lilac with conspicuous dark eye; 15 in.	.25	2.50
Helene—Beautiful lavander blue; 18 in	.25	2.50
Kathe—Rosy purple with a dark eye; 20 in	25	2.50
Louise—Bright lilac with carmine eye. Very strong growth; 24 in	.25	2.50
PHYSOSTEGIA—False Dragon-H	ead	
Hardy Perennial	caa	
P. Virginica Grandiflora—A plant much valued for		
hardy borders, blooming as it does in August when flowers are scarce. In good deep soil, will attain a		
height of over seven feet; bears long spikes of bright		
but soft pink flowers	.15	1.50
P. Virginica Grandiflora Alba—Pure white, very attractive	.15	1,50

E	ach.	Doz.
PLATYCODON—Chinese Bellflow	er	
Hardy Perennial		
These are closely allied to the Bellflower family and derive the name of "Balloon Flower" from the shape of the buds. They enjoy a very rich, loamy soil and are most attractive plants for the border, bearing blue blossoms for about a month or six weeks, beginning about the middle of July. They are best planted when quite young, as they do not bear disturbing after once established.		
P. Maresii—A splendid variety of dwarf habit with		
very large flowers of a purplish blue color\$	.25	\$ 2.50
P. Grandiflorum—Very handsome variety, about 2 it. high, blooming in July and August. Flowers a deep blue two to three inches across	.15	1.50
POLEMONIUM—Jacob's Ladder	•	
Hardy Perennial		
Excellent border plants with strikingly handsome		
and effective blossoms. The foliage is also very hand- some, closely resembling some of the ferns. They flour- ish in rich, deep, well-drained loam and prefer partial shade.		
P. Cæruleum Grandiflorum—A very large form of P.		
Cæruleum having long spikes of large blue blossoms\$	.15	\$ 1.50
P. Cæruleum Grandiflorum Album—A fine white form of the above	.15	1.50
POLYANTHUS—Bunch Primros	e	
Hardy Perennial		
The Polyanthus is an indispensable spring flower and should be used largely in flower beds and borders, also wild gardens and rockeries. It likes an open, half-shady position in rich soil and under such conditions will bear flower stems a foot high.		
P. Exhibition Blue-A very beautiful strain, having		
flowers from deep to light blue\$	.50	\$ 5.00
P. Munstead Strain—In shades of yellow, from cream to dark orange, selected and perfected by Miss Jekyll		
of England for the past thirty-five years	.25	2.50
P. Pink and Red Shades—Very handsome, ranging from light to dark red, with yellow eye	.25	2.50
TIOH HERE TO HALK ICH, WITH VCHOW CVC	.40	A.0U

DD-11-11-1		
PRIMULA—Primrose		
Hardy Perennial		
A race of plants little known in America, but forming one of the most attractive features of the spring garden. They are perfectly hardy in our Michigan climate and once established are as sturdy as our oaks. The different varieties range in size from four inches to three feet, and in time of blooming from early April until late summer.		
P. auricula alpina—Exceedingly choice plants for the rockery. Our strain is from the great Primula specialist in Scotland and comprises a wide range of colors. Very fragrant	.50	5 00
red, shading deeper to eye, which is of rich yellow. Very new and very choice	1 00	10.00
P. "Asthore"—Coppery old rose flowers, tinged with	m =	H F0
heliotrope and shading deeper to the yellow eye P. Beesiana—Distinct type of Bulleyana and pulverul-	.75	7.50
enta but later than either, with flowers of various		
shades of purple with yellow eye; 3 ft	.75	7.50
ers rich golden yellow, shaded orange buff, borne in		
whorls on stiff stems; 2 ft	.50	5 00
P. Bullesiana Hybrids—A new strain of Hardy Primulas with the constitution of P. Japonica resulting from the crossing of P. Bulleyana and P. Bessiana. They were given an AWARD OF MERIT by the Royal Horticultural Society in 1916. Colors range		
from cream to many shades of yellow, orange, pur- ple, lilac, pink and crimson. They are very hardy		
and prefer a half shaded position that is fairly moist	.50	5.00
P. capitata—Producing dainty heads of handsome violet blue flowers, dusted with a white mealy powder.		
Likes a partially shady, moist position; late; 1 ft	.50	5.00
P. Cashmeriana—Flowers much the same as denticu-	50	F 60
lata but of a deep purple	.50	5.00

Primula denticulata

	Each.	Doz.
P. Cockburniana—A lovely species recently introduced from Western China, bearing scarlet flowers in		
whorls; very striking. Makes a wonderful combina- tion of color planted with Bulleyana. Biennial; 1 ft	.50	5.00
P. cortusoides—A distinct Siberian species, with soft, wrinkled heart-shaped leaves. Flowers in early summer, deep rose. Prefers light, rich, well-drained soil,	•	
in a sunny position, in border or rockery; 10 in		3.50
P. crispa—Similar to capitata. Prefers a boggy place P. denticulata—Very handsome, large flower heads, in various shades of lilac. One of the first to bloom.		5 00
Prefers a moist, shady position; 2 ft		5.00
P. denticulata alba—A beautiful white form of the above; 2 ft	.50	5.00
P. farinosa—Silvery foliage and rosy purple flowers;	.35	3.50
P. Forresti—A beautiful variety recently introduced from China. Flowers on slender stems, deep orange, and very fragrant. Prefers well drained, half shady position in rock garden		7.50
P. frondosa—Similar to farinosa, with rosy lilac		
blooms	.35	3.50
P. involucrata—Lovely in a damp, shady place; umbels of white, drooping flowers; 1 ft	.50	5.00
P. Japonica Hybrids—A fine strain of this beautiful Primrose in shades of purple	.25	2.50
P. "Lissadell Hybrid"—A cross between pulverulenta and Cockburniana. Very vigorous with flowers of a beautiful soft vermillion; 2 ft	.75	7.50
P. "Ailin Aroon"-Another cross between pulver-		
ulenta and Cockburniana; flowers light scarlet		7.50
P. "Red Hugh"—Intense fiery red. Very new and exceedingly choice	1.00	10.00
P. Listers Hybrids—Very new. Many beautiful shades of color	.75	7.50
P. luteola—Heads of pale yellow blossoms about six inches high. Robust plant and very attractive	50	5.00
P. Poissoni—Very handsome Primrose from Northern China. Light foliage and flowers of a deep purple		
with a bright yellow center, in whorls. June and July; 2 ft	.50	5.00
P. pulverulenta—Rich crimson in color, in whorls, on stems 3 ft. high. One of the finest varieties	.50	5.00

P. pulverulenta, "Mrs. Berkeley"—A very beautiful form of pulverulenta, having pale, blush flowers with a saffron eye. Very choice; 3 ft		ich.	Doz.

, <b></b>		

### VIOLA—Tufted Pansy

Hardy Perennial

The Viola is not as well known in America as it should be for it is perfectly hardy in well-drained soil and a most profuse bloomer from early Spring until Fall. It needs deep, well-enriched soil and considerable sun, with plenty of water. Ideal for carpeting rose beds as the roses afford just enough shade. The colors are varied, as in Pansies, but much more refined and need to be grown to be appreciated.

т.	Each.	Doz.
Do not allow to seed, as it will stop the bloom	tacii.	D02.
and early in September cut back all straggling growth,		
when the plant will make new tufts.		
V. Ariel-Mauve, beautifully shaded with white\$	.35	\$ 3.50
V. Aurora—Bluish purple. Immense bloomer	.35	3 50
